## Polycarboxylate Based High Range Water reducing Admixture

Polycarboxylate Based High Range Water reducing Admixture is a new generation of polycarboxylic acid series high-performance water-reducing agent. It combines the macromolecules and small monomers of polyoxyether through free radical copolymerization. It has a very high water reduction ratio and low slump loss, which can ensure a high water reduction rate during concrete production, and is widely used in pumping concrete.

<b>Item</b>	<b>Unit</b>	<b>Standard</b>
Appearance	/	White powder
Density(23℃)	Kg/m <sup>3</sup>	500±50
PH (23℃)	/	6.0±1.0
Solid Content	%	97.0±1.0
Moisture content	%	≤3.0
Water Reducing Ratio	%	≥25

Cl <sup>-</sup>	%	≤0.02
Alkali content	%	≤0.3

### **Main Applications**

(1). Suitable to make early strength concrete, retarding type concrete, precast concrete, cast in situ concrete, large flow concrete, self-compacting concrete, mass concrete, high performance concrete and as-cast finish concrete, as well as precasting and cast in situ for various industrial and civil architecture. Especially suitable for low strength grading commercial concrete.

(2). Can be widely applied in the projects such as high speed railway, nuclear power, water conservancy and hydropower projects, the subway, large bridges, highways, harbor pier and other major national projects.

(3). Suitable for commercial concrete agitate stand for any industrial and civil buildings.

### **Features/Benefits**

(1). Strong dispersion and high water reducing ratio.  
Suitable for making high strength concrete.

**Zibo Zhuoxing Enterprises Co., Ltd.**

(2). Polycarboxylate Based High Range Water reducing Admixture Can effectively reduce concrete viscosity, good adhesion, moderate air content, suitable for pumping.

(3). Hardening and durability of concrete is good. Strength is high at every concrete ages. Good volume stability and anti-permeability, freezing thawing, anti-corrosion and anti-carbonation effect is good.

(4). Widely suitability for all mixing materials, such as portland cement, ordinary portland cement, slag portland, fly ash cement and volcanic ash cement.

(5). Environmental friendly and nontoxic.

### **Our advantages**

SGS certified Chinese supplier

Provide product search, offer, quality control, warehousing, international logistics, etc one-stop service

Offer customization product and all-around product application programs according to customers' requirement

Supply FREE sample and accept small orders

Accept Customized Packages
